At South Suburban Cancer Center, we believe in multidisciplinary management of cancer which means more than just providing medical or radiation therapy treatment. The physicians and staff believe firmly in patient education which means answering the patient's questions and helping them get in touch with community resources such as home care, nursing, transportation, support groups, home care equipment and hospice services thus making your fight against cancer a team effort.

Patient counseling and education is our major focus and is just as important as the treatment of cancer itself.

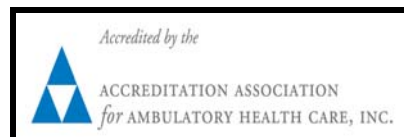

Our recent re-accreditation by the AAAHC demonstrates our commitment to providing the highest level of quality care to our patients, and the same high level of conduct in our business practices. Accreditation by the AAAHC is proof of this commitment, and signifies that we have met the rigorous standards of a nationally recognized third party.

We are proud to have met the challenge of accreditation once again, and intend to consistently uphold the principles of quality improvement and patient care.
